

THE FOOD RETAIL INDEX

NOVEMBER 2022

The Food Retail Index November

	Total sales In store & e-commerce	Total sales In store	Total e-commerce sales
Monthly growth November 2022	8.7%	9.5%	-5.9%
Cummulative growth 2022	5.5%	6.9%	-17.7%
12 months rolling	5.1%	6.5%	-18.1%

Monthly growth refers to the sales development the current month, compared to the same month last year.

Cummulative growth refers to the sales development so far this year, compared to the same period last year.

12 months rolling refers to the sales development during the last 12 months, compared to the previous 12 month period.

The Food Retail Index

The Food Retail Index is produced by the Swedish Food Retailers' Federation in cooperation with HUI Research who is responsible for the collection of statistics and quality assurance of data. The purpose of The Food Retail Index is to produce trustworthy and quality-assured statistics on the sales trend of the grocery trade on a monthly basis. The grocery index measures sales growth in the grocery trade and does not include specialized food stores or service trade. The report is based on sales statistics collected 12 times a year from grocery retailers and follows developments and trends for grocery retail growth both in in-store sales and online.

The following actors participate in the statistical collaboration:

Coop and Stora Coop, City Gross, Delitea, EKO, Eurocash, Hemköp, ICA Nära, ICA Supermarket, ICA Kvantum, ICA Maxi, IKEA Food Services, Lidl, Linas Matkasse, MatHem, Matkomfort, Mat.se, Middagsfrid, Tempo, Willys and Willys Hemma,

Definitions:

Total sales

Total sales growth of goods and services between two periods including new and/or closed stores (in-store sales and e-commerce). Sales growth thus relates to the companies total number of stores between the two periods. The total sales include food and non-food

Total in-store sales

In-store sales growth of goods and services between two periods including new and/or closed stores. The total in-store sales include food and non-food.

Total e-commerce sales

E-commerce sales growth of goods and services between two periods where both click and collect, and home delivery is included. Total e-commerce includes both meal kits and online grocery shopping. The meal kits consist of recipes and ingredients for a specific number of meals planned in advance by the online grocery store. Online grocery shopping refers to goods and services selected by the customer. The total e-commerce sales include food and non-food.

Click and collect in store

E-commerce sales growth of goods and services with click and collect in stores between two periods.

Home delivery

E-commerce sales growth of goods and services with home delivery between two periods.

E-commerce share of total sales

The e-commerce share refers to how much of the total sales that comes from sales with home delivery and sales with click and collect.

Accounting units

The companies included in The Food Retail Index report sales in absolute numbers (Swedish kronor) for total sales.

*Contact HUI for more information
